-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Request For Continued Examination

1. A Request for Continued Examination (RCE) was received on 10 August 2005.

Amendments

2. A Preliminary Amendment was received on 10 August 2005 and a Supplemental Amendment was received on 29 September 2005.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 7 – 11, 13 – 18 and 20 - 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 7, 13 and 20 are not clearly understood. In particular in Claim 7, "a first pattern displacement between first and third monitor resist patterns: and "a second pattern displacement between second and fourth monitor resist patterns" have been described. It is not clear whether the term "between monitor resist patterns" denotes between which position and which other position. It is also not clear in reference to what the displacement is occurring. Claims 13 and 20 have similar problems.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2851

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1 – 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese reference 2000 – 310850.

The reference discloses an exposure monitor pattern formed by two window portions increasing in optical transmittance in different directions. See Figs. 14 and 18. A mask is used to make the double exposure. In order to inspect the exposure dose the monitor patterns as shown in Figs. 14 and 18 meet the limitations of claim 1 and would have been used as described by one of ordinary skill in the art.

7. Claims 12 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Reference 200- - 319871).

The reference discloses correcting an exposure dose for the fogging exposure dose by obtaining the fogging exposure dose in an exposure method for forming a pattern by overlaying two steps of exposure and is described in paragraphs [0112 and 0115 –122].

8. Claims 7 – 11, 13 – 18 and 20 – 25 will be reexamined for patentability after the applicant's next response.

Conclusion

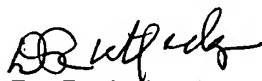

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited reference are corresponding or equivalent US references for JP 2000 – 310850 and US 2001/0018153.
